

## **"Better Than Before"**

Our motto, "Melior Quam Ante" exemplifies the purpose and objective of the Mystic Krewe: to improve ourselves and everything around us, to explore the limits of our abilities in fun, rewarding and creative ways.

## **Impetus**

Human beings are capable of doing pretty cool things.

Humans, working collectively, can accomplish even more.

Humans, working collectively, with common priorities and purpose, can achieve epic goals.

## **Values**

Our membership espouses certain core values that we hold key to the success of our objectives:

- \* Curiosity - a desire to learn new things
- \* Generosity - a desire to share with others
- \* Passion - a desire to do everything to the best of our ability
- \* Honesty - a sincere desire to understand and be understood
- \* Loyalty - to our fellow members and communal objectives
- \* Ethical - to hold ourselves to a higher standard

## **Action**

This world is full of constant attractions, distractions and "subtractions" which take away time, resources and trajectory.

We in the Mystic Krewe pledge to do more than talk, to think more than dream, to push beyond the limits of what our peers claim is possible, making no excuses, and minimizing any compromises.

# **Our Projects and Activities**

## **The "PinChurch!"**

*Our flagship project involves the acquisition and total renovation of a church building that was destroyed and abandoned after Hurricane Katrina. It houses part of the club's collection of vintage pinball and other arcade machines and technology, as well as a state-of-the-art audio and video production studio, an internet cybercasting stage, and a full-featured workshop capable of all manner of fabrication, repair and restoration of a wide variety of materials.*

## **Special Events**

*We host a wide variety of special events, many exclusively for club members featuring live national acts, touring musicians, speakers and artists, as well as sanctioned pinball tournaments. We showcase amazing A/V internet, FX, sound and lighting technology, most of which is designed by our members!*

## **Classes and Education**

*We host both private and public classes on a wide variety of subjects (whatever our members desire to learn, we find experts and custom-tailor hands-on learning experiences) from basic electronics design & repair, mobile phone app programming, and computer systems, to welding, arts & crafts, video editing and production, learning to play musical instrument, pyrotechnics, business & marketing — you name it. We are constantly building new skillsets and exploring both new and old technology.*

## **Business Opportunities**

*Our membership is a unique mix of both seasoned entrepreneurs and working class people who desire to do more with their lives and careers. This presents regular opportunities to collaborate in various business ventures, creating unique, fun and flexible new products and services.*
